

FENET BERHANU

Front-End Web Developer

your-email@example.com | your-phone-number | github.com/berhanufen | fenetportfolio.netlify.app

PROFILE

Front-end web development student at Hilcoe Institute of Technology, building responsive, well-structured websites from the ground up. Comfortable working independently across HTML, CSS, JavaScript, and React, with a growing portfolio of practice builds, page clones, and small applications. Known for strong problem-solving, patience, consistency, hard work, and punctuality.

EDUCATION

Hilcoe Institute of Technology

Student — Front-End Web Development

SKILLS

HTML5 • CSS3 • JavaScript • React • Git & GitHub • Responsive Design • Netlify Deployment

PROJECTS

Puppy Lovers — *HTML, CSS, JavaScript*

A playful, responsive site for dog and puppy lovers, with a warm, image-led layout.

<https://puppyloverr.netlify.app>

Apple Website Clone — *HTML, CSS, JavaScript*

A pixel-conscious recreation of Apple's product marketing pages, rebuilt from a clean repository.

<https://current-apple-page.netlify.app>

Dynamic To-Do List — *JavaScript*

A to-do list app with dynamic add, complete, and delete functionality.

<https://dynamictodolists.netlify.app>

Bookstore — *HTML, CSS*

An online bookstore interface for browsing and organizing titles.

<https://bookstorewebsitee.netlify.app>

Form Creation & Validation — *JavaScript*

A form built with client-side creation and validation logic.

<https://formcreationvalidation.netlify.app>

ALX Front-End React Projects — *React, JavaScript*

A set of front-end applications built with React as part of ALX coursework.

STRENGTHS

- Problem-solving — works through issues methodically until they're resolved
- Patience — takes the time needed to get details right
- Consistency — shows up and delivers reliably over time
- Hard work — puts in the effort a task actually needs
- Punctuality — respects deadlines and other people's time
